Attachment A

FACULTY PERFORMANCE REVIEWS

Faculty of Health

For probationary and definite term contract appointments – evaluation is conducted annually.

For permanent or tenured faculty - evaluation is conducted every two years (biennial cycle is conducted on "odd" year cycle).

Faculty awarded tenure or permanence during an even year – evaluation will be conducted for a single year, and then the following evaluation will be based on two years to transition to the biennial cycle.

Note: Members shall provide documentation for the calendar year(s) under evaluation (one year for members holding probationary or definite-term appointments, and two years for members holding permanent or tenured appointments). In addition, members shall provide documentation for the number of previous years specified by their Faculty Guidelines. Scholarship shall be assessed on the total evidence from a window of two years. Teaching and service shall be assessed on the evidence from the year(s) under evaluation. The remaining documented years shall provide context to the assessed evidence (MoA article 13.5.2 (b)).

[1]For review year(s): 2023-2024

Faculty member's name: Kelly Anthony

Rank (as of Dec 31): Associate Professor, Teaching Stream

Appointment Type: Permanent

Appointment Category:

Current/previous sabbatical/special leave, unpaid leave, and sick leave date:

Please indicate reduced workload weighting percentage, if different than 100%:

Weightings need to be formalized in the member's letter of appointment; any changes must be confirmed, in writing, with Chair/Director (copy to be forwarded to the Faculty Office for personnel file).

For members on a biennial performance review cycle, the rating for non-review years shall be equal to the rating for the previous review year.

[1] A member who does not submit the required documentation by the specified deadline, normally will receive an overall rating of at most 0.5 as specified in MoA 13.5.3.

Workload Weightings:

Year 1:		Year 2:	
Teaching	80%	Teaching	80%
Research		Research	
Service	20%	Service	20%

A. Teaching Activity: Please document the extent of your involvement in and quality of teaching since the previous evaluation (ending Dec 31).

As per Faculty Relations Committee, academic units should be open to other sorts of evidence of teaching and provide clear rules for what counts for summative evaluations and what is to be used for formative purposes.

Courses Taught:

1. Please list the courses that you taught over the faculty performance evaluation year(s):

Course and term	# enrolled	First time teaching?	Graduate/ Undergraduate	Online or in-person	Did you develop this course?	Required or elective	Team-taught course (y/n)?
Year 1 (ending Dec 31)							
		N	U/G	IP	Y	Req	N
		N	"	IP	Y	Elec	N
		N	"	IP	N	Elec	Y
HLTH 260 W '23		N	U/G	IP	Y	Req	N

F 2023 HLTH 448	5	4.8	33	22	
W 2023. HLTH 260	4.3	4	84	143	

NOTE:

Below are some representative comments from the past few terms. This past year, I worked really hard to bring my teaching back to much stronger days. I had tried to challenge my students with often difficult critical thinking quizzes and more 'big ideas', dissenting/minority expert viewpoints within public health, and I think I pushed too hard too fast. I worked this past year or two to make sure they were 'with me', and to explain why I was doing what I was doing in terms of my pedagogical strategies and areas of emphasis. I feel confident that I am delivering courses that are truer to my commitment to great teaching while at the same time being challenging and actually teaching them critical thinking skills which are so difficult to teach.

There is extensive opportunity on these reviews to talk about research productivity, but not as much to talk about one's teaching. I have added a smattering of student comments that I think reflect what I try to do in the class. I haven't had someone do an in person peer review for many years; I would welcome that.

_____

Some comments that reflect my concerted efforts to actually teach and assess critical thinking.

1) **From 303 this term:** most important thing learned:

"the importance of assessing past work and outlining clear plans to correct any issues should evaluations/assessments go unexpectedly bad. logic models were also really interesting to learn about

what helped me learn:

the professor's choice for interactive activities, and a heavy grading system based on group work allowed me to actually engage with course concepts rather than only quizzes

suggested changes:

i think a big thing that shocked me when i came into the course was the difference of quiz style between the (wonderful) professor and other professors im used to. generally, the quizzes ive done were more about memorization, but i found it difficult to understand what exactly i should study and memorize for the quizzes in this course. nonetheless, i think this course has a superior method of provoking class engagement compared to just memorizing, so i just wish there was a greater focus in the beginning of the course not on memorizing concepts (which led to me confused a lot) but rather on engaging in class activities and speaking to the prof more. i.e., clarification that we are not supposed to memorize concepts early on would have helped me i think"

2) **"most important thing learned:**
   you need evidence based practice and clear goals and objectives when doing program evaluations. It is also important to have a through understanding of the community impacted and the program, as well as having key stakeholders involved in the process.
   what helped me learn:
   Attending the prof's lectures and office hours really helped with the content, as well as doing the readings before hand and taking my time to read the content with a critical lens also helped."

"3) **most important thing learned:**

how to think more critically about everything around me , kelly Anthony provided me with a framework that allows me to view the world in a much more refined and nuanced way

what helped me learn:

Without Kelly Anthony as the lecturer, this course really does not have much substance to it however her presence in lectures is genuinely a privilege to experience as she can articulate the most mundane topics in the most intriguing and insightful ways. I always leave every class with a lesson relating to program planning and evaluation but also with the invaluable lessons I learn from Kelly herself. As an undergrad, I feel so privileged to have people like Kelly as my professor, the wisdom and experience she offers to her students is simply incredible in the truest sense of the word."

HLTH 303 F 2024 (50% response rate)

learning outcomes received an average score of **4.1**
graded work received an average score of **4.0**
outcomes assessed received an average score of **4.1**

course concepts received an average score of **4.2**
supportive environment received an average score of **4.7**
interest received an average score of **4.2**

HLTH 448. Fall 2024 (68% response rate)

learning outcomes received an average score of **4.8**
graded work received an average score of **4.7**
outcomes assessed received an average score of **4.9**

course concepts received an average score of **5**
supportive environment received an average score of **4.9**
interest received an average score of **4.9**

Comments from 448 F 2024

1) **most important thing learned:**
   This course was the most interesting and informative course that I have taken during my entire degree. Going to actual sites and organizations in the community was unbelievably valuable to my understanding of SDH. This course gave us the opportunity to talk directly to the actual people impacted by SDH and community programs,

and it showed us the real-life impact of the programs and policies that we will be working towards. The experiences and perspectives this course gave me were so fundamentally impactful, that honestly, I think this course, or similar courses where we can go in-person to community sites, should be integrated into our degrees in the Health faculty and it should be mandatory for everyone in our program to experience this as part of our degree at UW.

what helped me learn:

As I said above, by far the most invaluable thing about this course was the in-person site visits. As well, I would say that our class discussions and debriefs afterwards further enhanced our learning by allowing us to hear the different perspectives and opinions of our classmates.

suggested changes:

Again, the only thing I can suggest for this course is that it should keep running after Dr. A retires, and that our faculty should find a way to have everyone in the health programs take this course, with in-person site visits to see the community programs that enact change and to that meet the people who are actually impacted by the programs and policies that we often learn about.

2) most important thing learned:

I learned the importance of being open minded and challenging what I think, always seeking for opportunities to learn from people with different perspectives, experiences and knowledge. This class put me face to face with the social determinants of health and provided experiences and lessons that I wouldn't have obtained through other courses. Anyone pursing a career in public health or healthcare should take this course, as it really shows you firsthand what the social determinants are and what people/organizations are doing to understand and overcome them. It's critical to have a good foundation in this area, as it can impact health at both upstream and downstream levels, informing policies, services, education and more. Even though I had learned about the social determinants of health in classrooms before, the real life experiences gained from this course deepened my understanding more than imagined.

what helped me learn:

How interactive and reflective it was. The community outings were exciting and novel, allowing me to meet people and see things that I wouldn't have been able to on my own. Being able to reflect on these experiences and combine it with what I've learned throughout my undergrad classes provided a holistic understanding of the social determinants of health. The instructor encouraged us to step out of our comfort zones and think critically, creating a space that welcomed divergent thinking. The way it was structured really encouraged me to be present and involved; instead of relying on heavy notetaking or memorizing everything that was said like in other classes, I really just tried to listen and reflect. This made what I learned feel more meaningful.

suggested changes:

None!

3) most important thing learned:

The importance of perspective and putting yourself in others shoes. Not being judgemental and assessing how ones social determinants shaped them to be who they are today.

what helped me learn:
The weekly field trips in the KW community

suggested changes:
Nothing it was my favourite course taken in my whole undergraduate career thus far :)

Response ID 1297339 | Submitted Nov. 20, 2024, 5:06 p.m. (view full response)

4) most important thing learned:
I learned the importance of the broken systems we have. I enjoyed learning how to deal with these different situations and how to interact with different people who may be less fortunate then me

what helped me learn:
Going on different field trips and actually being able to observe different situations. I also really enjoyed talking to different people who have gone through those situations as well as hear multiple different stories.

suggested changes:
No changes this was an amazing course

PHS 638 S 2024 (88% response)

learning outcomes received an average score of **4.7**
graded work received an average score of **4.5**
outcomes assessed received an average score of **4.6**

course concepts received an average score of **4.9**
supportive environment received an average score of **4.9**
interest received an average score of **4.9**

Comments from 638 S 2024

Response ID 1285468 | Submitted July 25, 2024, 10:54 p.m. (view full response)

most important thing learned:
Everything! There were perspectives on topics I was not familiar with every week. This course took current problems rather then just theories and textbook reading to actually deliver material that was not only interesting but unlike most courses, was actually relevant.

what helped me learn:
My background and interest in political science.

suggested changes:
N/A

Response ID 1289254 | Submitted July 29, 2024, 1:50 a.m. (view full response)

most important thing learned:
Multipronged approach to social justice

what helped me learn:
Discussion board with other studnets

suggested changes:
more organized

Response ID 1290769 | Submitted July 29, 2024, 8:16 p.m. (view full response)

most important thing learned:
Despite a world of grey in matters of health and social justice, resources are limited, audiences and society diverse, and so concrete and unideal solutions may come to be. Long-term, "upstream" solutions may often be more favorable, but short-term solutions may be selected depending on the circumstance (such as extent of crisis/ demand, or political weather). A useful tool to come to just conclusions given the complexities of justice is Rawls's Veil.

what helped me learn:
Course readings, discussions.

suggested changes:
Include/ announce learning outcomes for each week that link to a broader list of learning outcomes in the course.

Response ID 1288974 | Submitted July 28, 2024, 4:58 p.m. (view full response)

most important thing learned:
Understanding the many contributors to social justice and the difficulty AND importance of addressing issues.

what helped me learn:
Instructor involvement in discussions for Devil's Advocate and provocative thinking

suggested changes:
None - this course was wonderfully done. Might be nice to have some on-camera office hours for the class to drop-in for discussions, but certainly not necessary as prof was very engaged on discussion boards.

Response ID 1285565 | Submitted July 26, 2024, 8:54 a.m. (view full response)

most important thing learned:
How to chat with others about major social issues in a respectful way.

Had I taken this course during my undergraduate studies, I would have reacted differently to some comments. Dr. A encouraged us to respect differing opinions while also allowing us to express ourselves openly. This approach has not only benefited me in this course but has also positively impact my personal life, helping me respond to and think differently about people with opinions that are polar opposite to my own.

what helped me learn:

I think Dr. A did a great job with how the discussion in this course was structured. In other classes I have taken, the discussions were not as meaningful and engaging as they were in this course. It was great to be able to openly chat with and learn from my peers about various social justice issues.

suggested changes:
I thought this course was really great overall. But a couple ideas that could be taken into consideration would be:

1) Conduct a poll at the start of the semester on topics that folks would like to cover throughout the course (I liked all the topics but this is just an idea).

2) Have some leniency for missing one or two weeks of discussions/quizzes. A lot of folks in the class are working part/full time and it is also the summer, so building something into the syllabus that if they miss one or two weeks it can be dropped from their mark.

most important thing learned:
Think critically and examine issues from different perspectives. Even things that seem black and white rarely are.

what helped me learn:
The supportive nature Dr. A. created for having conversations about difficult or sensitive topics. My views were consistently challenged and I learned so much from my instructor and peers.

suggested changes:
None. This was the most enjoyable course I have taken in my whole program.

Response ID 1286054 | Submitted July 26, 2024, 9:55 a.m. (view full response)

most important thing learned:
To remove one's interests and biases when considering social justice, and ask oneself "if I were in that situation, what would matter to me..." Applying Rawl's veil of ignorance.

what helped me learn:
Often in classes with like minded people, we tend to share similar ideology. The use of the Devil's Advocate approach helped to explore differing perspectives and arguments in favor of or in contrast with popular opinion.

suggested changes:
None, I think the class was excellent. As was the professor. Very approachable and real.

From 2023 303 feedback:

Suggested changes: "I would suggest providing more time for in-class activities to ensure the submission of optimal work since these are graded, and to provide adequate time for students to ask questions. It would also have been helpful to know what exactly is required to achieve full marks in the form of a rubric or in a short description, as the basis of grading seems a little vague at times otherwise. I also would suggest fewer lengthy-readings when possible."

This 2023 comment, I think, nicely shows what I attempted to improve from the 2023 course to the recent one. The ratings went up quite a bit, and this comment reflects the areas that needed some improvement. The scores were ok, but I wasn't happy. I think the 2024 ratings reflect my efforts to improve and the receptiveness of the students to my efforts.

Curriculum Work:

1.2 Please list course design or implementation changes and any new course development undertaken during the faculty performance evaluation period.

Date	Nature of the activity
S 2023-current	Added/integrated material (Constructive Dialogue Insitute) modules and supporting pedagogy to support/encourage thoughtful and constructive class engagement and discussion into all classes
S 2023-current	Began inviting students (former and current) who are engaged in program evaluation or social determinants of health related work to do mini-guest lectures.

Add additional rows as necessary.

Professional Development and Scholarship:

1.3 Please list any professional development related to teaching (e.g., workshops, conferences, training, etc.) undertaken during the faculty performance evaluation period. How has this impacted on your teaching practice?

Date	Nature of the activity
S 2023	**Attended (and presented at) the University Teaching and Learning Conference**
W 2024	Completed entire certification process

Add additional rows as necessary.

1.4 Please list work on the Scholarship of Teaching and Learning (e.g., publications, presentations at conferences or workshops, etc.) undertaken during the evaluation period.

Date	Scholarship of teaching and learning
S 2023	**Invited workshop on the use of CDI pedagogy modules in my classes (UW Teaching Conf)**
S 2023	Presented preliminary class research on improving class engagement/discussion using CDI modules (Heterodox Academy Annual Conference, Chicago) Invited talk on increasing engagement/discussion in the class using CDI tool (Constructive Dialogue Institute Annual conference) Denver, CO)

Add additional rows as necessary.

2. <u>Student Supervision</u>:

Please list the supervision tasks that you have undertaken over the evaluation period.

2.1 Undergraduate student: Total ( ); Completed ( ); In progress ( )

Student name	Thesis/independent study	Start date	Date of completion/in progress	Co-supervisor (if applicable)

Add additional rows as necessary.

2.2 Graduate students and postdoctoral fellows: Total ( ); Completed ( ); In progress ( )

Student Name	Level (MSc, PhD, PDF)	Start date	Date of completion/in progress	Co-supervisor (if applicable)

Add additional rows as necessary.

List all students that you worked with as a committee member. For each student, include name, start date, level of study, role, and date of completion, if appropriate.

2.3 Committee Member: Total ( ); Completed ( ); In progress ( )

Student name	Level (MSc, PhD, Comprehensive)	Dept/School	Start date	Date of completion/in progress

Add additional rows as necessary.

B. Scholarly Activity:

Summary for Click here to enter YEAR.	
Full refereed published articles	Enter number
Full refereed in-press articles	Enter number
Other scholarly work	Enter number
Books	Enter number
Book chapters	Enter number
Refereed published conference proceedings	Enter number
Refereed in-press conference proceedings	Enter number
Book reviews and other short written communications	Enter number
Invited presentations at scientific meetings	Enter number
Self-initiated presentations at scientific meetings	Enter number

(OPTIONAL: Comments on the quantity or the quality of your research, e.g., impact of publications and/or presentation.)

1. **a) Full refereed <u>published</u> articles for the last two years (indicate dates)** Click here to enter number of publications.

   Indicate students with an asterisk (*). Please indicate if this publication has formed part of a previous annual review. "In press" articles reported in one year should not be reported the next year as "published".

   b) Full refereed <u>in-press</u> articles Click here to enter number of articles. - use "in-press" instead of "accepted" or "forthcoming". *"In-press" implies that the editor has informed the author that there are no changes to the manuscript required prior to publication.*

   c) Scholarly work outside of the usual peer reviewed venues is valued, however, the onus is on the faculty member to provide evidence of its quality, impact and relevance. (Insert DOI # if known) Click here to enter number of scholarly works.

2. **Books:** Click here to enter number of books.

3. **Book Chapters:** Click here to enter number of book chapters.

4. **Refereed published or in-press conference proceedings:** Click here to enter number of conference proceedings.

5. **Book reviews and other short written communications:** Click here to enter number of book reviews/short communications.

6. **Invited presentations at scientific meetings** (as distinct from seminars at other universities, for example): Click here to enter number of invited presentations.

7. **Self-initiated presentations at scientific meetings, abstracts** [indicate peer reviewed by abstract with an asterisk (*)]: Click here to enter number of self-initiated presentations.

8. **Grants and contracts** (include: author(s), agency, title, amount, and dates of grants; the order of authors should be the same as on the grant application). Indicate your own role on the grant (i.e., PI, Co-PI, Co-I, Collaborator, etc.)

   a) Currently held and in progress (new)
   b) Received (list current on-going grants, for example: in the 3rd year of a 5-year grant) (old)
   c) Applied for
   d) Rejected

   Add additional rows as necessary.

Author	Agency	Title of research contract/grant	Amount	Duration (MM/YY)	Role	Status (currently held and in progress, received, applied for, rejected)
Sub-total: PI ( ) **Sub-total: Co-PI ( )**						
Sub-total: Co-I ( )						

9. **Non-refereed publications and presentations** (talks to nonscientific groups and university classes should be included in service).

10. **Non-refereed proceedings of scholarly/professional meetings:**

11. **Technical reports, policy briefs produced:**

12. **Describe any other research translation activities undertaken, not otherwise described:**

13. **Patents** (e.g., material transfer agreements, etc.):

C. Service:

Nature and scope of service contributions

Faculty members are required to describe the nature and scope of their service contributions, including an estimate of time spent on each item so that they can be properly evaluated. Only service directly related to your role as a faculty member should be reported. Do not include service which you perform as an independent citizen.

Service can be divided into four categories: Service to the University of Waterloo, including faculty and department; service to your profession (if applicable); service to academia; service to the broader public that is related to your position as a faculty member.

For each type of service, provide title/role, name of sponsor, agency/organization, estimated number of hours during the year, and whether the service was assigned by a chair, dean, or other person) or voluntary. In any category, please add any comments related to quality or quantity that you believe would assist in the evaluation.

1. **Service to University/Faculty/Dept.**
    a. **Committees (include ad hoc)**

2. **Service to your Profession** (i.e., Professional associations)
    a. **Membership**

    b. **Committees, etc.**

3. **Service to Academia**
   List activity as reviewer of:

    a. **Grant applications:**

    b. **Journal articles:**

    c. **Other** (e.g., mentorship and/or providing letters of support for award nominations, grant writing)

4. **Service to the Broader Public** related to your position as a faculty member, community service related to professional activities (e.g., Speaker's Bureau, High School Talks, etc.)

5. **Other**

D. Awards:

Describe any teaching/supervision, research or service awards won during the year, including the name, sponsor, amount, date, and objective of the award.

Attachment B

FACULTY PERFORMANCE REVIEW

WORK PLAN

Faculty of Health

Name:

For Calendar Year(s):

1. Teaching plans for the coming year. Indicate teaching assignment, new courses, curriculum development, number of graduate students, student supervision, mentorship, etc. The assessment should consider the quality of student supervision, not merely its quantity.

2. Anticipated scholarship activities. Include editorial board activities and other activities.

3. Service activities. Note major commitments to the University and/or professional organizations.

Note: Relative weights for teaching, scholarship and service are normally 40-40-20. Use the space below to make application for a change in these weights.

Attachment C

To be completed by Chair/Director

Faculty of Health

Faculty Performance Review Acknowledgment

Faculty member's name: **Rank:**
Department/School:

Year 1 Weighting Percentage (YYYY): Jan-Dec/YYYY **Weighting: 20-40-20 (example)**
Format - Administrative title: dates in role (dates applicable to evaluation year)
Example - Associate Chair of Undergraduate Studies: July 1 2020 – June 30, 2023 (January – December 2021; 12 months)

Year 2 Weighting Percentage (YYY: Jan-Dec/YYYY **Weighting: 20-40-20 (example)**
Format - Administrative title: dates in role (dates applicable to evaluation year)

Rating categories:

2.0	Outstanding	1.25	Good	0.5	Needs improvement
1.75	Excellent	1.0	Satisfactory	0.25	Needs major improvement
1.5	Very Good	0.75	Needs some improvement	0.0	Unsatisfactory

For members on a biennial performance review cycle, the rating for non-review years shall be equal to the rating for the previous review year.

Rating Scores (YEAR 1 AND/OR YEAR 2):
